

I, Byron Lloyd Altice, am in support of net neutrality.

I believe that easing our current restrictions on Internet Service Provider companies will be detrimental to our society. Our freedom to share and disseminate information hinges on our ability to be heard on the internet. A free and open Internet is a prime motivator for technology innovations that benefit the United States of America.

Allowing Internet Service Providers to classify types of internet traffic and giving priority to those types as they deem fit will give too much power over free speech and innovation to these companies.

Please uphold net neutrality.

Thank you,

Byron Altice
